This volume contains the papers presented at CISIM 2012, the 11th International Conference on Computer Information Systems and Industrial Management held during September 26–28, 2012, in Venice.

CISIM provides a forum for researchers from all over the world to discuss effective software support for widespread use of information systems technologies. The main focus of this edition was on data management in (possibly) untrusted networks, addressing the issue of securing computer networks so as to ensure reliable data management and delivery. The conference is supported by IFIP TC8 Information Systems.

Topics covered by CISIM include network and application security models and tools, security requirements definition and modelling, formal verification of security-relevant properties, security testing of legacy systems, data analysis, biometric security, advanced biosignal processing and modelling, biometric performance management, classification and indexing of multimedia information objects, multimedia security and protection, access control and data protection, Web security, security of SaaS in cloud computing environments, software engineering for cloud and ubiquitous computing, business process engineering and execution support, data protection in ERP systems, industrial applications: government, finance, retail, etc.

This year, 80 papers were submitted to CISIM. The volume contains 35 papers selected by the Program Committee based on anonymous reviews and discussions through EasyChair. The main selection criteria were relevance and quality. Every paper was reviewed by two to five reviewers, and the articles presented in this volume were deeply improved based on the reviewers’ comments.

The CISIM program included three keynote lectures by Roy Maxion (Carnegie Mellon University, USA), Pierpaolo Degano (University of Pisa, Italy), and Young Im Cho (University of Suwon, Korea).

We would like to thank all the members of the Program Committee, and the external reviewers for their dedicated effort in the paper selection process. We thank also the Honorary Chair of the conference, Ryszard Tadeusiewicz, and the Organizing Committee Chair, Andrea Marin.

We thank SAP, our industrial sponsor; the Venice chapter of ISACA; the DAIS Department of Ca’ Foscari University; the University of Calcutta; AGH Krakow; the Polish Academy of Sciences; AICA; Kairos Consulting; and Venezia Congressi.
We are also grateful to Andrei Voronkov, whose EasyChair system eased the submission and selection process, and greatly supported the compilation of the proceedings.

# Table of Contents

## Pattern Recognition and Image Processing

A New Algorithm for Rotation Detection in Iris Pattern Recognition  
*Krzysztof Misztal, Jacek Tabor, and Khalid Saeed*  
135

Outlier Removal in 2D Leap Frog Algorithm  
*Ryszard Kozera and Jacek Tchórzewski*  
146

Dynamic Signature Recognition Based on Modified Windows Technique  
*Rafał Doroz and Krzysztof Wrobel*  
158

Rigid and Non-rigid Shape Matching for Mechanical Components Retrieval  
*Andrea Albarelli, Filippo Bergamasco, and Andrea Torsello*  
168

Embedding of the Extended Euclidean Distance into Pattern Recognition with Higher-Order Singular Value Decomposition of Prototype Tensors  
*Bogusław Cyganek*  
180

## Biometric Applications

DTW and Voting-Based Lip Print Recognition System  
*Piotr Porwik and Tomasz Orczyk*  
191

Advances in the Keystroke Dynamics: The Practical Impact of Database Quality  
*Mariusz Rybnik, Piotr Panasiuk, Khalid Saeed, and Marcin Rogowski*  
203

Advanced Intracardial Biosignal Processing  
*Marek Penhaker, Petr Klimes, Jakub Pindor, and David Korpas*  
215

Multi-constraints Face Detect-Track System  
*Mliki Hazar, Hammami Mohamed, and Ben-Abdallah Hanène*  
224

Using a Differential Pressure Sensor as Spirometer  
*Martin Augustynak, Ondrej Adamec, and David Micanik*  
236

## Algorithms and Data Management

Hybrid Negative Selection Approach for Anomaly Detection  
*Andrzej Chmielewski and Slawomir T. Wierzchoń*  
242

Spectral Clustering Based on $k$-Nearest Neighbor Graph  
*Małgorzata Lucińska and Slawomir T. Wierzchoń*  
254

A New Scale for Attribute Dependency in Large Database Systems  
*Soumya Sen, Anjan Dutta, Agostino Cortesi, and Nabendu Chaki*  
266
